Jiacheng Wang

+33 7 64 43 53 85 | jiacheng.wang@eurecom.fr | Paris, France
github.com/jiacwng | linkedin.com/in/jiacheng-wang

Summary

Final-year Digital Security engineering student at EURECOM (Mines-Télécom), with a strong foundation in systems, programming and mathematics. Comfortable from low-level code to machine learning, with a rigorous, evidence-driven approach to evaluation. Native in Mandarin and French, fluent in English. Seeking a 6-month end-of-studies internship outside France, available immediately.

Projects

Meerkat | ML-Assisted SOC Alert Triage | Jul 2026 - Oct 2026

github.com/jiacwng/meerkat

- Developed a Python command-line tool that consolidates daily Wazuh, Suricata and AMiner alerts into a prioritised review queue, with each alert mapped to MITRE ATT&CK.
- Reduced 36,358 daily alerts to 326 ranked groups of related alerts for analyst review.
- Ranked alert groups with a Random Forest and a logistic regression re-ranker, detecting 57 of 60 attack steps against 33 when sorted by the detectors' own severity, on networks unseen in training.

eous | Fuzzy Hashing for PE and ELF Binaries | May 2026 - Oct 2026

github.com/jiacwng/eous

- Developed and published on PyPI a fuzzy hashing tool that identifies the same program across compilers by hashing machine instructions rather than raw bytes, and rejects packed or .NET files (Python, Rust, LIEF, iced-x86).
- Recognised the same program rebuilt with different compiler settings with an AUC of 0.726, against 0.570 for tlsh, the industry standard.
- Linked 67% of MalwareBazaar samples to their malware family from code alone, against 48% for import-based matching and 63% for tlsh.

deskclerk | Internal AI Agent on a Company's MCP Servers | Oct 2026 - Present

github.com/jiacwng/deskclerk

- Developed an internal AI agent that acts on a company's tools through the Model Context Protocol (MCP) with each employee's own OAuth permissions, OpenID Connect sign-in, MCP tool pinning and audit logging, tested on Linear's hosted MCP server (FastAPI, LangChain, Docker).
- Cut model cost per task by 43% at unchanged accuracy on held-out WorkBench workplace tasks by having TypeSafe's Jev decision model select the MCP servers each request needs.
- Integrated Jev as a prompt injection screen that flagged every injected tool output with no false positives, cutting successful attacks on AgentDojo from 19 to zero.

CTF Writeups | Binary Exploitation, Web, Forensics | Mar 2026 - Present

github.com/jiacwng/ctf-writeups

- Wrote 25 picoCTF writeups spanning binary exploitation, web exploitation, forensics, cryptography and reverse engineering.

Academic Projects

Mnemocrypt | Cryptographic Function Detection in x86 Binaries | Nov 2025 - Feb 2026

EURECOM semester project, extending an IDA Pro plugin from published research

- Broadened the training data beyond cryptographic libraries with a curated 13-library goodware corpus, embedded cryptographic routines stripped from the negative class.
- Cut false positives by 81% and raised precision from 0.60 to 0.86 on held-out functions with lane-aware SIMD instruction counting.

Experience

Software Engineering Intern | Reva 2, Nice, France | Jul 2025 - Sep 2025

- Built a full-stack web application in React and Express.js, deployed on OVHcloud.
- Secured it with Helmet security headers, strict CORS, API rate limiting and environment-based secrets.

Education

EURECOM, Mines-Télécom | Sophia Antipolis, France | Sep 2023 - Expected 2027

French Engineering degree (Diplôme d'ingénieur) specialised in Digital Security

- *Core modules:* System and Network Security, Hardware Security, Digital Forensics, Secure Communications, Machine Learning and Intelligent Systems, Computer Architecture, Distributed Systems and Cloud Computing.

Classe Préparatoire (CPGE), Lycée Descartes | Tours, France | Sep 2021 - Jul 2023

Skills

Programming: Python, C, OCaml, Java, Rust, SQL, JavaScript, TypeScript; x86-64 and RISC-V assembly.
Security & Reverse Engineering: IDA Pro, Ghidra, gdb, LIEF, SIEM and IDS (Wazuh, Suricata), Wireshark, nmap, MITRE ATT&CK, OAuth 2.0, OpenID Connect, Keycloak, Cloudflare.
ML & AI: Large Language Models (LLMs), scikit-learn, pandas, NumPy, SciPy, LangChain, Model Context Protocol (MCP), Hugging Face Transformers.
Web & DevOps: FastAPI, React, Next.js, Express.js, PostgreSQL, Docker, GitHub Actions, Linux, Git, pytest, Virtualization (VirtualBox).
Languages: Mandarin (Native), French (Native), English (TOEIC 930).

Volunteering

Volunteer French Teacher | Amours et Coeurs Unis en France | Mar 2026 - Present

Over 100 hours teaching French to non-native speakers and helping with administrative procedures.
